## New DFB Akademy Building Frankfurt

The new DFB Academy will be built on the site of the former racecourse, offering facilities for training and further education for football's top performers. In addition to the Academy, the DFB central administration with its organisational units, press centre and other facilities will be located here in the future.

In this new building project of the German Football Association, different functional areas are therefore combined in a joint building project. In addition to the DFB's administrative departments with press and conference rooms as well as restaurants, the new DFB Academy will include office and sports areas (a fitness and regeneration area, a football hall, a sports hall as a multi-purpose hall, outdoor sports areas) as well as training rooms and rooms for the athletes. A multi-storey car park with approx. 345 parking spaces will be built for parked vehicles.

The DFB awarded the contract for the turnkey construction to Groß & Partner Grundstücksentwicklungsgesellschaft mbH. GP Con GmbH has been commissioned to construct the excavation pit and the shell, including the steel roof.
